Interim Reference Letter

Mr. Tomas Becket Belda Oliver, born on 31 May 1978, has been employed in our company as a Product Owner since 01 December 2022.

The XXXLutz Group is one of the largest furniture retailers worldwide and has been heavily engaged in e-business for several years. For this purpose, a dedicated e-commerce division was established within the Group, which includes the technology department XXXLDigital. Within this framework, XXXLDigital creates the digital experience for customers of XXXLutz, Mömax, Möbelix and Lesnina across Europe. In addition, the unit delivers innovative apps and e-commerce shops that delight our customers.

Mr. Belda area of responsibility essentially comprises the following tasks:

- Develop and prioritize the product roadmap together with your stakeholders, ensuring that it aligns with the Product Family's, as well as XXXLDigital's strategy and overall business goals
- Develop and manage the product backlog, ensuring that it accurately reflects the priorities and goals of the product
- Formulate clear and concise user stories to demonstrate the user problem and need in the best possible way
- Work closely within cross-functional teams e.g. including Development, UX design, Business Analysts and other business functions to define problems, priorities and solutions
- Based on user feedback and defined key metrics, track the success of the product and use the insights to make data driven decisions about future development
- Collaborate with the required business teams to ensure features are appropriately launched and positioned with the customer (end-to-end responsibility)
- Actively establish and manage healthy stakeholder relationships by communicating on a regular, proactive basis, sharing information, updates or feedback, as well as by facilitating meetings with stakeholders and senior management in a professional manner
- Collaborate with other roles e.g. Product Owners in other teams, Software Developers, Architects to identify and evaluate new (technical) options that can improve the product
- Stay up to date on industry trends and emerging technologies and make recommendations for adoption where appropriate
- Document relevant decisions and processes to create maximum transparency for your area of responsibility and ensure these are maintained and accessible
- Rationalised and stabilised the test suite (eliminated flakiness, focused on high-value coverage), reducing CI noise and time-to-green builds
- Leverage automation expertise to embed quality gates in CI/CD (smoke, contract, and critical-path tests)
- Institute outcome-based discovery (user interviews, analytics, experiment design) to validate problems and solutions, increasing the success rate of launched features

During his time with us, Mr. Belda has consistently demonstrated outstanding professional expertise and an exceptional approach to his work. He completes all assignments with independence, efficiency, and a remarkable level of accuracy. His high level of commitment, combined with his proactive and solution-oriented working style, regularly leads to excellent and highly valuable outcomes.

XXXLdigital Vertriebs GmbH & Co.KG
Mergentheimer Str. 59
97084 Würzburg

He is an asset to every team, contributing thoughtfully, cooperatively, and with a consistently positive mindset. His dependability and engaging manner have earned him strong respect and trust from management, colleagues, and customers. Even when faced with demanding workloads, Mr. Belda remains organized, focused, and consistently performs far beyond expectations.

This interim reference is issued at Mr. Belda's request, which we are pleased to grant. We thank him for his exceptional performance thus far and look forward to continuing our productive and successful working relationship.

Barcelona, 27.11.2025

Bernd Stuppacher
Lead People Business Partner
